

Community Builder 2.0

JOOMLAPOLIS!

2004 - 2014

JoomlaDay France 2014, Paris, 24 mai 2014

Bonjour :-)

Beat

- Joomla-iste depuis 12 ans (ok, Mambo ;-)
- Top-20 Joomla 1.0.15 and 3.2.0 contributor
- Membre Joomla Security JSST and JBS
- ‘beat’ sur les forums, sinon en Suisse
- Ing. Dipl. EPFL, Dr. à l'EPFL + Bell Labs
- Datacoms, Internet, Sécurité & web-apps
- Ma devise:
“Make it as simple as possible, but no less”

La communauté: c’est le centre, la force de CB :
518’000+ membres, >2’000’000 sites (*source: google*)

Aujourd'hui...

- Introduction à Community Builder™ (CB) 2.0
- Le logiciel Libre: Valeurs et objectifs
- L'Architecture logicielle
- L'approche Intégration
- Community Builder 2.0: Nouveautés en détail
- Plugins CB:
 - Connect, Activity, Auto-Actions, GroupJive™, CBSubs™
- CB PRO 1.9.1 et 2.0, CB Packager
- CB 2.0 et AHA!WOW?

- Procédures d'enregistrement, profils, connections, listes, photos, vidéos, ...

100 % Libre GPL !

Le logiciel Libre (open source)

- Community Builder est libre **et** gratuit
- Les add-ons sont Libres avec abonnement 1 an
- L'expérience Libre à 100%...
- L'importance des données libérées
- Le problème du SaaS
 - Google Reader, Posterous, Google Wave, next: Google Mail ???

Valeurs et objectifs

- Une communauté forte et libre
- Fair-play, Fair trade, Respect, Ouverture
- Respect Privacité mais pas de secrets
- L'écoute, la réflexion, la discussion, et la réalisation
- Des solutions très très flexibles et extensibles:
 - **Généralisation des besoins**
 - Intégration très poussée des fonctions
 - Richesse des fonctions

Nouveautés CB 2.0 principales

- **Nouveau “look and feel” partout**
- 6 nouveaux types de champs:
file, video, rating, points, audio, date/time
- Champs Images avec:
 - avec **moderation** et **approbation** (CB Workflow)
 - nouvelle **galerie d'avatars**
- 3 nouveaux plugins ré-écrits et intégrés:
 - **CB Articles, CB Blogs** et **CB Forums**
- **CB Bootstrap template** (nouveau “default”)
- CBLib (AhaWow+++)

Nouveautés CB 2.0 (suite)

- Toutes les templates CB sont **bootstrappées** (default, winclassic, webfx, osx, dark, luna)
- CB field manager:
 - **Layouts** Profile, Userlist, Profile edit, Registration
 - Copy fields et Change field type
 - Déactivation édition profils (édition admin seul)
- Support **emails HTML** pour emails workflow
- Nouveau module administrateur:
 - admin menu, CB news feed, CB plugin update feed
- Langues multi-clés et pluralisations
- +++ Total: **139 nouvelles features**

CB 2.0 Joomla menu types

Articles

Community Builder

Login Form This is an optional menu item for accessing Community Builder Login page. Normally not needed, as you would normally use Community Builder login module for this. This menu requires the CB Login module to be installed to work.

Manage Connections This is an optional menu item for accessing Community Builder connection management. Normally not needed, as you would normally use Community Builder workflow module for this so it adapts automatically to login state.

Moderate Bans This is an optional menu item for accessing Community Builder ban moderation. Normally not needed, as you would normally use Community Builder workflow module for this so it adapts automatically to login state.

Moderate Images This is an optional menu item for accessing Community Builder image moderation. Normally not needed, as you would normally use Community Builder workflow module for this so it adapts automatically to login state.

Moderate Reports This is an optional menu item for accessing Community Builder report moderation. Normally not needed, as you would normally use Community Builder workflow module for this so it adapts automatically to login state.

Moderate User Approvals This is an optional menu item for accessing Community Builder user approval moderation. Normally not needed, as you would normally use Community Builder workflow module for this so it adapts automatically to login state.

Plugin This is an optional menu item for accessing Community Builder plugin pages.

Registration Form This is an optional menu item for accessing Community Builder Registration page. Normally not needed, as you would normally use Community Builder login module for this so it adapts automatically to login state.

User Logout This is an optional menu item for directly logging out the user from Community Builder and Joomla. Normally not needed, as you would normally use Community Builder login module for this so it adapts automatically to login state.

User Profile (mandatory!) This is the main menu item of Community Builder. Please create only one of them and make sure that this menu item is of public access and published.

User Profile Edit This is an optional menu item for accessing Community Builder User profile edit. Normally not needed, as Community Builder has its own menu system on the user profile for this action.

Userlist This is the menu item for accessing Community Builder Users lists.

Username/Password Reminder Request This is an optional menu item for accessing Community Builder Username/Password reminder. Normally not needed, as you would normally use Community Builder login module for this so it adapts automatically to login state.

The screenshot shows the Joomla! Menu Manager interface for creating a new menu item. The title bar indicates 'Menu Manager: New Menu Item' and the Joomla! logo is visible. The main content area is titled 'Menu Manager: New Menu Item' and contains several form fields and tabs. The 'Menu Title' field is filled with 'All members userlist'. The 'Alias' field is set to 'Auto-generate from title'. The 'Menu Item Type' dropdown is set to 'Userlist'. The 'List ID' field is '1'. The 'Search Mode' dropdown is 'Show List'. The 'Link' field is 'index.php?option=com_comprofiler'. The 'Target Window' dropdown is 'Parent'. The 'Template Style' dropdown is '- Use Default'. The 'Menu Location' dropdown is 'Main Menu'. The 'Parent Item' dropdown is 'Menu Item Root'. The 'Ordering' dropdown is 'Published'. The 'Default Page' dropdown is 'No'. The 'Access' dropdown is 'Public'. The 'Language' dropdown is 'All'. The bottom status bar shows 'View Site', '1 Visitor', '1 Admin', and '0 Log out'. The Joomla! version is 3.3.0 and the copyright is © 2014 CB20.

Community Builder 1.9.1 vs. 2.0

JOOMLAPOLIS!

@ J Day France 2014

CB 1.9.1 Admin view & Access

The screenshot shows the Joomla! Admin Control Panel. The top navigation bar includes System, Users, Menus, Content, Components, Extensions, and Help. The Components menu is open, showing a list of options: Banners, Community Builder, Contacts, Joomla! Update, Messaging, Newsfeeds, Post-installation Messages, Redirect, Search, Smart Search, Tags, and Weblinks. The Community Builder option is highlighted. The left sidebar contains various management tools categorized by CONTENT, STRUCTURE, USERS, CONFIGURATION, EXTENSIONS, and MAINTENANCE. The main content area displays several widgets: a message about reviewing messages, a 'LOGGED-IN USERS' section showing 'Super User Admin' logged in on 2014-05-21, a 'POPULAR ARTICLES' section with '10 Getting Started' from 2013-11-16, and a 'SITE INFORMATION' section listing OS Darwin, PHP 5.4.10, MySQLi 5.5.29, Time 19:30, Caching Disabled, GZip Disabled, and Users 1. The bottom status bar shows 'View Site', '0 Visitors', '1 Admin', '0' messages, and 'Log out'. The Joomla! version is 3.3.0 and the copyright is © 2014 CB191.

L'approche Intégration

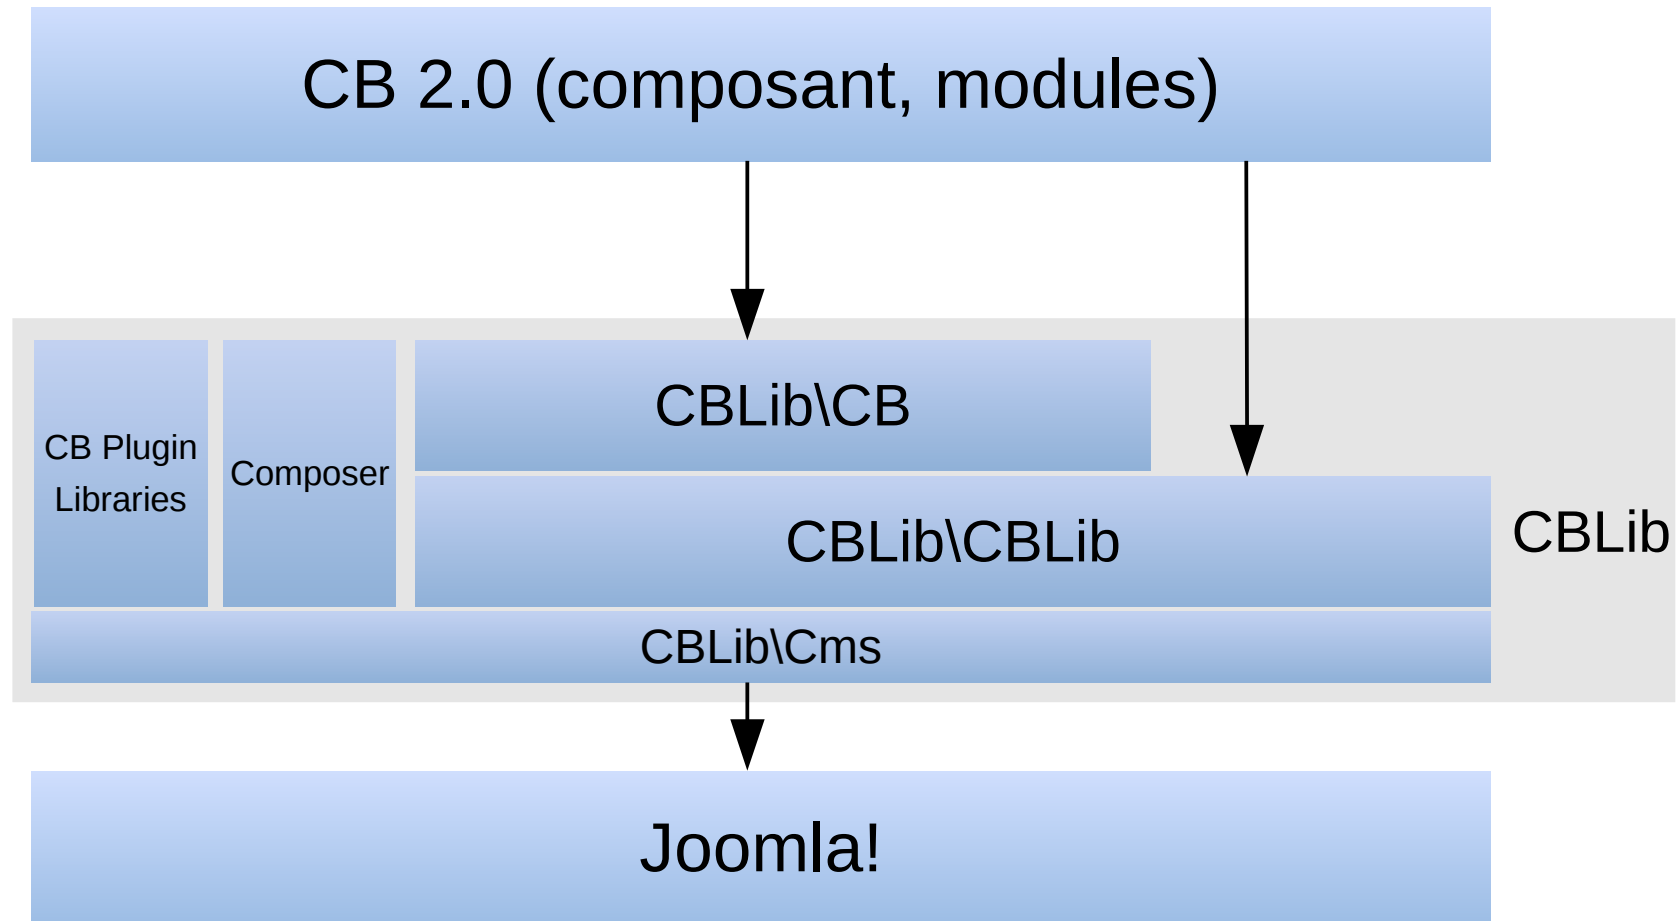

- CB est avant tout un puissant outil d'intégration d'applications
- Centré sur l'utilisateur
- Beaucoup d'extensions intègrent avec CB
- Quelques exemples:

Architecture logicielle CB 2.0

Architecture logicielle CB 2.0

Architecture logicielle CBLib

- CBLib 2.0 a une architecture moderne:
 - Très légère (“Small is beautiful”, et entièrement modulaire
 - Utilisant les nouvelles fonctionnalités PHP 5.3, en particulier:
 - Namespacing
 - Interfaces
 - Closures and function variables
 - Utilisant de manière extensive
 - Dependency Injection Containers
 - Class Interfaces
 - Inversion of Control
 - Aspect Oriented Programming
 - Entity-Relation-Processor
 - Model-View-Controller

Architecture logicielle CBLib

- CBLib 2.0 inclut:
 - AhaWow™ : Specification-based execution
 - Dependency Injection (DI) Containers
 - Observers+Mappers
 - Languages (incl. Pluralizations + Multi-keys)
 - Auto-loaders for PHP, XML and languages
 - Permissions and Access handler
 - Database Schema checker and upgrader
 - Database Query Compiler
 - Image Library
 - LESS + Bootstrap 3
 - Legacy Compatibility Layer

CB: Extensibilité: ses plugins

Environ 100 plugins du CB Team

- Et 180+ autres plugins
- Installable (y.c. upgrades sans dé-installation)
- 4 types de plugins:
 - Extensions CB tabs et field-types (peuvent être des combos tabs + field-types)
 - CB langues
 - CB templates
 - Intégrations

AHAWOW

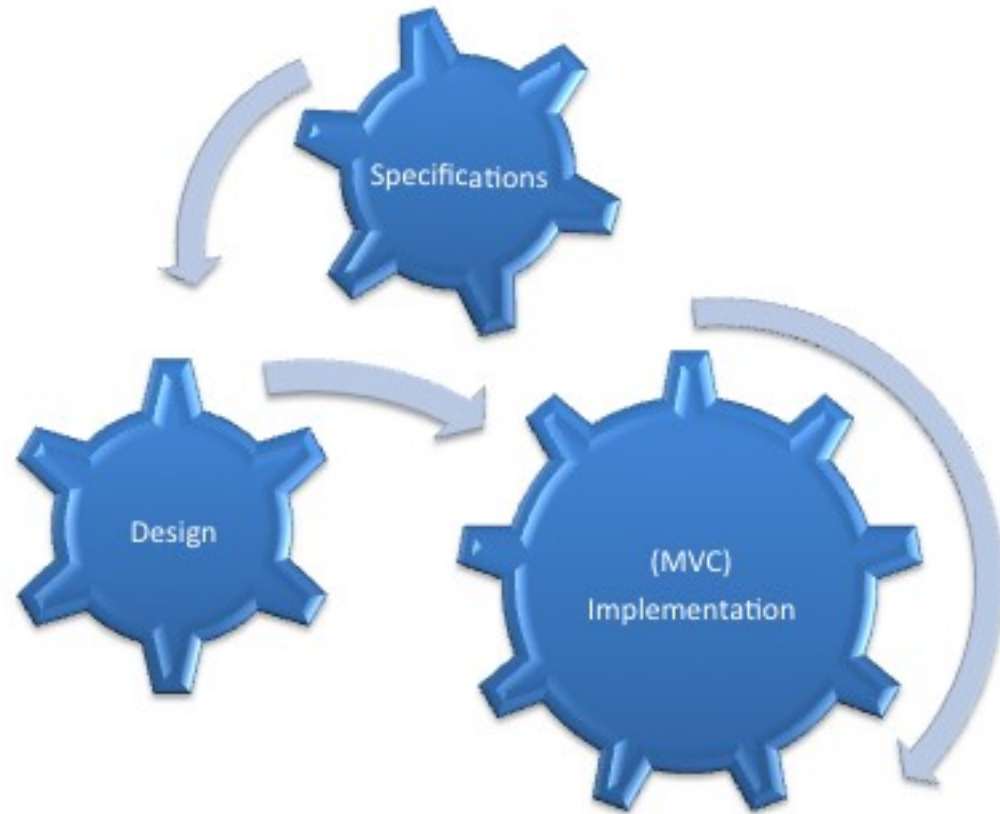

JOOMLAPOLIS!

Traditional design

- Specify
- Design
- Implement (in MVC)

...Unrelated !

Community Builder 2.0

- **5 Years of research** at Joomla! Labs!

Related !

Look Ma !

NO Implementation!

No `<?PHP ?>` code!

No `<script />` code!

No SQL queries!

AHA? WOW!™

Automatic
Homogenous
Applications ?

Web
Optimized
Workflows !

AHA? ...Compare... WOW!

Classical (H)MVC:

- Model+View+ Controller **implementation**
- + **Helpers**
- **and Javascript** helpers
- Not hierarchical
- Not agonistic (PHP)
- “COPY-PASTE” code
- Lot of layouting
- Not formal

AHA?WOW!™ MVC:

- **Specification only**
- Hierarchical – MVC
- Agonistic (portable)
- DRY, no specific code
(or very little)
- **Formal**

AHA?WOA!

So.....?

...The 2' Example: Currency rates browser

1 Model:

```
<table name="#__currencies" class="Currency">
  <columns>
    <column name="id" type="sql:int(11)" label="Currency Id" />
    <column name="base_currency" type="sql:varchar(3)" label="Base currency" />
    <column name="currency" type="sql:varchar(3)" label="Target currency" />
    <column name="rate" type="sql:float" null="true" label="Exchange rate" />
  </columns>
</table>
```

This installs / upgrades database !

② Controller:

Controller links Model with View

```
<action name="show_currencies" request="view" requestparams="showcur" >  
  <showview view="showcurrencies" mode="show">  
    <model name="currencies">  
  </showview>  
</action>
```

3 View:

Views define Items to display & Layout

```
<view name="showcurrencies" type="params" ui="admin" label="Currencies">
  <tablebrowser name="currenciesbrowser" label="Currency exchange rates">
    <listfields>
      <rows type="standard" height="auto" limit="15" >
        <field name="" type="rownumber" width="20px" align="right" label="#" />
        <field name="id" type="primarycheckbox" width="20px" />
        <field name="currency" type="string" width="10%" label="Currency" />
        <field name="base_currency" type="string" width="30%" label="Base currency" />

**CBSubs GPL 3.0
uses already
AHA?WOW!™
*CB 2.0 now too !***

CBSubs Administration: 0 lines of specific code

- 6900 lines of specifications (core CBSubs CB plugin) only

- 41 controllers
- 50 views
- 56 models
- 397 “queries”
- 650 settings

The screenshot shows the Joomla! Administration interface for the CBSubs plugin. The main section is titled "CB Paid Subscriptions: Payments Center". Below the title, there is a "Payments Center" section with a description and a version notice. A "Last 7 days payments" section features a table and a line chart. The table lists payment dates, transactions, completed amounts, pending amounts, and various subscription metrics. The chart shows a trend of payments over time. Below the chart is a "Main menu" section with various icons and statistics for different parts of the system.

Paid on	Transactions	Completed	Completed	Pending	New Registrations	Upgrades	Renewals	New	Upgrades	Renewals	Transactions
16/05/2012	5	EUR 10,07		EUR 0,00	---	3	2				
04/05/2012	8	EUR 7,70		EUR 1,10	---	3	---				
03/05/2012	2	EUR 1,10		EUR 1,10	---	2	---				
30/04/2012	6	EUR 587,16		EUR 0,00	---	9	---				
29/04/2012	2	EUR 578,51		EUR 316,75	---	8	---				
28/04/2012	4	EUR 120,79		EUR 11,00	---	4	---				
27/04/2012	7	EUR 518,83		EUR 86,47	---	7	---				

`ONE' MORE THING...

- **AHA?WOW DOES MUCH MORE:**
- includes:
 - Database-agnostic query-compiler
 - Formal dataset query specifications
 - Inheritance
 - Permissions & Access Levels handling
- Handles 100% of the Admin interface
 - Toolbar, Menus
 - Online Help
 - All field Types
 - Tables, Graphs, Widgets, ...
- And is event-driven and event-triggering

Conclusion

- That was **5 Years** of research in **5'**

● **AHA?WOW!** TM

Running:

- **Community Builder 2.0**
- CB 2.0 Plugins
- CBSubs GPL 3.0

Conclusion

Community Builder™ n'est pas juste un produit™ pour un réseau social. C'est:

- Un Framework Libre avec une API
- Une architecture modulaire
- Une méthodologie
- De l'innovation
- Une grande communauté fair-play
- Des fonctionnalités étendues
- Une grande compatibilité

Community Builder est un outil web puissant

Merci !
