We had to organise a harvest past the optimal maturity for pickling the fruit on the tree.

The fruit then dehydrated, it lost some acidity and its aromatic concentration increased.

Les templates

The screenshot shows the Joomla! administrator interface. At the top, there is a navigation menu with items: System, Users, Menus, Content, Components, and Extensions. The current page is titled 'List & Search Type: [Edit] [SEBLOD Workshop]'. A modal dialog box titled 'New List & Search Type' is open in the center. It contains two questions: 'What kind of items are you searching for?' with a dropdown menu set to '- None', and 'How do you want to display these items?' with a grid of eight list templates: Accordion, Blog, Chart, List, Map, Masonry, Table, and Tabs. The 'Create' button is highlighted in blue. In the background, a table of existing list types is visible with columns for List, Item, Status, and ID.
