RIGHT THING**

Errors ^{H1}

A typical page with accessibility or usability errors.

The sample text below is from [Wikipedia: Bear](#).

[Learn more about Bears on Wikipedia >](#)

Bears are carnivoran mammals of the family Ursidae. They are classified as caniforms, or doglike carnivorans. Although only eight species of bears are extant, they are widespread, appearing in a wide variety of habitats throughout the Northern Hemisphere and partially in the Southern Hemisphere. Bears are found on the continents of North America, South America, Europe, and Asia. Common characteristics of modern bears include large bodies with stocky legs, long snouts, small rounded ears, shaggy hair, plantigrade paws with five nonretractile claws, and short tails.

While the polar bear is mostly carnivorous, and the giant panda feeds almost entirely on bamboo, the remaining six species are omnivorous with varied diets. With the exception of courting individuals and mothers with their young, bears are typically solitary animals - [learn more](#). They may be diurnal or nocturnal and have an excellent sense of smell. Despite their heavy build and awkward gait, they are adept runners, climbers, and swimmers.

Error

This text does not have enough contrast with the background. The contrast ratio should be at least 4.5:1 for normal text and 3:1 for large text.

The contrast ratio is **1.63:1** for the following text:
Ailuropodinae (monotypic with the giant panda),

in the suborder Caniformia, or "doglike" carnivorans, within the order Carnivora. Bears' closest living relatives are the pinnipeds, canines, and mustelids. The word "bear" is a Germanic language, such as Swedish björn, also used as a first name. This is derived from the Old Norse word bjorn, meaning "the brown one".[1][2] However, Ringe notes that while this etymology is plausible, it is not certain. The word "bear" is also used in "the brown one".[1][2] However, Ringe notes that while this etymology is plausible, it is not certain.

Evolution ^{H4}

The earliest members of Ursidae belong to the extinct subfamily Amphicynodontinae, including Parictis (late Eocene to

/AN ACCESSIBILITY STATEMENT

- Some countries require an accessibility statement.
- All sites should have one.
- Forces you to consider the issues.
- Shows that you care about everyone.

<https://tee.mn/a11ygen>

Assistant à la création de votre déclaration d'accessibilité

La Commission européenne a proposé, [au moyen d'un acte d'exécution](#), un modèle de déclaration d'accessibilité qui exige que certaines informations soient présentes dans la déclaration.

Afin d'aider les autorités publiques à rédiger leur déclaration d'accessibilité conformément à [la directive européenne sur l'accessibilité du Web](#), BOSA a [développé un assistant](#) qui les guide pas à pas à travers tous les éléments nécessaires.

Avant de pouvoir remplir votre déclaration, il faut vous munir de quelques éléments qui vous aideront à gagner du temps :

- Le rapport d'audit d'accessibilité du site pour lequel vous souhaitez faire la déclaration
- Les coordonnées du service responsable de l'accessibilité de votre site
- Les informations sur d'éventuelles transformations à venir sur votre site
- Les alternatives que votre site propose pour permettre à tout citoyen d'accéder à toute l'information donnée sur votre site qui ne serait pas encore conforme aux critères WCAG 2.1

L'aide du service responsable des aspects plus techniques de votre site peut s'avérer intéressante mais n'est pas obligatoire.

A la fin de cet assistant, les données saisies sont traitées dans une page HTML réutilisable qui, dans la plupart des cas, peut simplement être copiée dans le système de gestion de contenu du site auquel elle s'applique.

Lors des prochains changements sur votre site ou application, vous gagnerez du temps et de la visibilité en imposant à vos fournisseurs de tenir compte directement des critères d'accessibilité !

Assistant à la création de votre déclaration d'accessibilité

La Commission européenne a proposé, [au moyen d'un acte d'exécution](#), un modèle de déclaration d'accessibilité qui exige que certaines informations soient présentes dans la déclaration.

Afin d'aider les autorités publiques à rédiger leur déclaration d'accessibilité conformément à [la directive européenne sur l'accessibilité du Web](#), BOSA a [développé un assistant](#) qui les guide pas à pas à travers tous les éléments nécessaires.

Avant de pouvoir remplir votre déclaration, il faut vous munir de quelques éléments qui vous aideront à gagner du temps :

- Le rapport d'audit d'accessibilité du site pour lequel vous souhaitez faire la déclaration
- Les coordonnées du service responsable de l'accessibilité de votre site
- Les informations sur d'éventuelles transformations à venir sur votre site
- Les alternatives que votre site propose pour permettre à tout citoyen d'accéder à toute l'information donnée sur votre site qui ne serait pas encore conforme aux critères WCAG 2.1

L'aide du service responsable des aspects plus techniques de votre site peut s'avérer intéressante mais n'est pas obligatoire.

A la fin de cet assistant, les données saisies sont traitées dans une page HTML réutilisable qui, dans la plupart des cas, peut simplement être copiée dans le système de gestion de contenu du site auquel elle s'applique.

Lors des prochains changements sur votre site ou application, vous gagnerez du temps et de la visibilité en imposant à vos fournisseurs de tenir compte directement des critères d'accessibilité !

S Grand format | Guerre en Ukraine: faut-il maintenir le dialogue avec Poutine?

Depuis le début de l'invasion de l'Ukraine par la Russie, le 24 février dernier, plusieurs pays, l'Union européenne et les Nations unies essayent de jouer au médiateur pour tenter une sortie de crise. S'il est important de garder le contact avec le président russe, les multiples tentatives des uns et des autres n'ont jusqu'à présent rien donné. Le constat est clair : les conditions ne sont pas réunies pour pouvoir entamer un véritable dialogue débouchant sur un cessez-le-feu ou un accord de paix avec le maître du Kremlin.

Joomla! Testing

[Red](#) [Yellow](#) [Green](#) [Lime](#)

Thanks for helping us to test Joomla!

[Apples](#)[Blog 2 column](#)[Quick Icons](#)

We're getting ready for the release of Joomla and we appreciate you helping us find and fix problems as we work.

If you haven't done testing before here are some tips.

- Don't delete the installation folder when you finish installing! While we're working we turn that security feature off to make it easier to test.
- Go to global configuration and set Error Reporting to Development (that's on the server tab) and enable both debugging and language debugging (those are on the system tab). Don't worry when you see ** around words --that means Joomla translation is doing its job.

How to test

- First, do the things you normally do and see if you spot any problems.
- Look at all of the front end views and record any problems
- Look at all the back end views and report any problems
- See more ideas below

What to look for
